

Autumn gate times announced for Single Undergraduate Housing

Student Housing Operations

May 19, 2022, 11:45 pm

On May 19, single undergraduate students who submitted their housing applications by April 18, 2022, by 5:00 pm, will be emailed a gate time, which is the date and time they can select their house and room for next year. If you are part of a group, every member of the group will have the same gate time. Gate times are randomly assigned within each class year. Rising seniors will receive the best gate times, then rising juniors, then rising sophomores. If you are in a group with a mix of class years, your gate time will be assigned based on the lowest class year. For example, a group of two juniors and a sophomore will receive a sophomore gate time.*

- If you do not select a room before 5 p.m. PT on Friday, May 27, you will be randomly assigned to a house and room within your neighborhood.

* Students who have specific housing needs due to a disability or documented medical condition, as well as any members of their group, will not participate in the self-select process and will not be assigned gate times. Instead, they will be assigned in advance of the House and Room Selection process. This is to ensure that the student with the medical need is placed in housing that meets their needs

**Students who successfully pre-assign will be assigned a gate time but will only be able to select a room within their pre-assigned residence.
